

Materials for Aerospace Applications

Howco is a global processor and distributor of high-performance stainless steel, titanium, nickel alloys and super alloys and provides exceptional service and effective supply chain partnerships. We have a history spanning more than 40 years in the most critical environments - currently operating across 10 locations in 6 countries and 4 continents.

Aerospace Certified Materials

Our certifications include **AS9100D**. We hold extensive inventories of nickel alloys, stainless and speciality grades including Alloy 625 and Alloy 718 for the aerospace industry. These are fully-compliant to aerospace specifications, and we have the capabilities to provide bespoke solutions, processing, testing and precision component manufacturing.

Our full-service offering combines: a comprehensive range, full cycle traceability, fast and efficient supply and premium quality materials for the manufacturing of critical parts - supported by worldwide delivery to OEM and tier suppliers across aerospace markets.

- Quality assurance
- Aerospace certified stock
- AS9100D accreditation
- Full traceability and reliability
- Technical support and tailored solutions
- Logistics excellence with OTIF deliveries
- World class, worldwide service
